CHINOOK RV.COM

The Sports Car of Motorhomes

[Glacier](#) | [Destiny](#)
[Concourse](#) | [Premier](#) | [Baja](#)
[Chinook Quality](#) | [Home](#)

Ten reasons why
CHINOOK RV is
 the **best built**
class C motorhome
 in the **world!**

1) Structural Integrity

Don't be misled by false claims. CHINOOK manufactures the only one-piece, molded Fiberglass body in the industry. Patented, aerodynamic design with a lifetime guarantee - durability and structural integrity second-to-none.

2) Driving & Handling

The handling of a luxury sedan, performance of a sports car, and all the luxuries of home. Less driving fatigue - ready to enjoy when you get to your destination. Can be parked and driven like a van or sport utility vehicle, but with all the appliances and capabilities of larger coaches.

3) Safety & Reliability

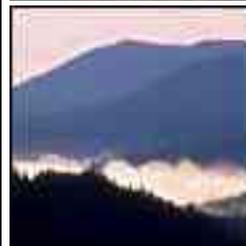

CHINOOK offers the highest level of safety available in RV's today. New CHINOOK owners enjoy a 3-year/36,000-mile CHINOOK workmanship warranty, Ford and Chevy warranties and 24-hour roadside assistance programs. The lowest warrantee-claim record in its class - meets all FMVSS, CMVSS, CSA, Ford and Chevy QVM and RIVA standards.

4) Resale Value

Automotive quality with long-term value! CHINOOK RV has the highest resale value in its class. New or used - loyal CHINOOK owners tell us that once they've owned a CHINOOK, they'll never own anything else!

5) Innovative Design

Well-designed living space and storage compartments for maximum comfort and convenience. The modern-day CHINOOK is the result of over 4 decades of design innovation, modifications and improvements. We listen to what our customers are asking for - improving on our current models, and developing new

products to meet market demands.

6) Construction Materials

CHINOOK uses the finest construction materials available. Innovative DIAB sandwich materials, vacuum bagging and resin-infusion techniques make CHINOOK's new one-piece fiberglass shell lighter, stronger, and more durable than ever.

7) Amenities & Appliances

Where style meets the road! CHINOOK offers the most luxurious fixtures, appliances and amenities in its class including handcrafted hardwood cabinets, Corian countertops, wall-to-wall carpet with Rebond pad, available tile in kitchen and bath, available all-leather furniture, and more!

8) Electronics & Components

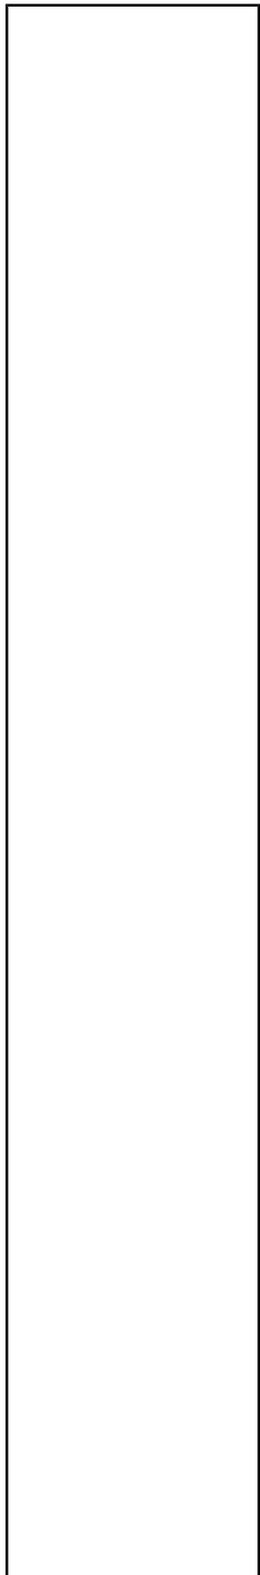

CHINOOK's Glacier 2500 and Summit 2700 are the only class C motorhomes with HWH, state-of-the-art CAN (Controlled Area Network) technology. Top-of-the-line entertainment components, kitchen appliances, generators, and Global Positioning System (GPS) also available.

9) Custom Manufacturing

With the exception of our Dealer display models, every CHINOOK is built-to-order to exact customer specifications. Buyers choose from a variety of optional floor plans, interior color schemes, custom paint, and upgrade packages.

10) Attention to Detail

Depending on the model, it takes up to 900 labor-hours to build a CHINOOK - more than twice the amount of time spent on any other class C motorhome. Our attention to detail and rigorous quality assurance program are unparalleled.

Frequently Asked Questions

- Problem:** If at a campground what kind of Amp Service is used - 15, 30 or 50?
- Suggestion:** Our Motor Home shore power cords are designed for 30 Amp service.
- Problem:** Batteries will not hold a charge.
- Suggestion:** Check the water levels. Deep Cycle Batteries need a slow charge if they go dead. A 3 Amp trickle for 2 or 3 days. A higher Amp charging rate will only give the battery a surface charge that will not hold.
- Problem:** The house battery goes dead.
- Suggestion:** The batteries may not be charging from the engine alternator. Check the fuse in the power distribution panel (See Ford Owners Manual). Check the water levels in the batteries.
- Problem:** Furnace does not run overnight.
- Suggestion:** The batteries are low. The furnace and refrigerator are the two biggest draws on the battery system.
- Problem:** The furnace is inoperable.

- Suggestion:**
1. Low battery.
 2. The furnace fan has to run at a pre-set RPM before the gas valve will open and allow the furnace to light.
 3. Check the heat vents to make sure the butterflies are open, this will also cause low RPM's if they are closed.

Problem: The furnace blows cold air.

- Suggestion:**
1. Check the LP bottle to make sure that it is on.
 2. Check the thermostat for the temperature setting.
 3. Check the butterflies in the heat vents to make sure that they are open all the way.

Problem: Will not switch from generator to shore power.

Suggestion: There is a built in transfer switch on the converter that performs this function. This would need to be checked by a Service Center.

Problem: The generator will not start.

Suggestion: The generator is wired to the house batteries. The batteries may be low enough that the generator will not start. Start the Motor Home and try starting the generator. Check the 80 amp breaker located on the passenger side of the firewall. (Not on all models)

Problem: The generator rattles when running.

- Suggestion:**
1. Check the exhaust pipe to see if it is loose.
 2. The fuel line may be sucking air.

Problem: The propane gauge reads wrong.

Suggestion: Float in the tank may be stuck - take to an authorized propane dealer for repair. The tank has an 80% shut-off valve in it, which is required by law. This means your tank, when filled will only read about 3/4 full.

Problem: The propane gauge is inoperable.

Suggestion: There are 2 gauges on the propane system. There is a sight gauge at the tank itself and an indicator on the monitor panel. If the monitor panel is not working, check the wire connections at the sight gauge. Note that the gauges are in different increments - one reads in 1/4's and the other reads in 1/3's.

Problem: The LP detector keeps going off.

Suggestion: This device has two functions - it will indicate a low battery as well as an LP leak. If your LP detector goes off do not assume that it is a low battery condition - *Check for LP leaks.*

Problem: No power at the outlets in Coach.

Suggestion: Check the GFCI outlet located on the shower wall just inside the back door.

Problem: The TV has no reception except when on cable.

Suggestion:

1. Check the A/B switch to make sure it is on TV setting. This switch is located in the front overhead storage. (This switch has 2 functions: the "A" side which is the upper button controls the antenna & VCR; the "B" side which is the lower button is for cable hookup which may also be used for hook-up for a DSS antenna.)
2. Check the TV menu screen for setting TV in antenna mode.
3. Check the TV antenna booster to make sure it is turned on.

Problem: The Beverage Mate is inoperable.

Suggestion: Check the fuse - see the Chinook Owners Manual.

Problem: The roof vent leaks air and/or rattles, or will not close all the way.

Suggestion: There is an adjustment that can be made, we do have a flyer showing how to do this, it is best done at a Service Center.

Problem: How do you drain the fresh water tank?

Suggestion: You can open the tank drain valve or open both line drains and turn the water pump on and pump the water out. Be careful not to let the water pump run for an extended amount of time without water in it.

Problem: How do you drain the black water tank?

Suggestion: You can open the tank drain valve or open both line drains and turn the water pump on and pump the water out. Be careful not to let the water pump run for an extended amount of time without water in it.

Problem: Where is the phone jack located?

Suggestion: It is located in the front overhead compartment behind the VCR.

Problem: What is the recommended tire pressure?

Suggestion: It is 65 PSI in the front tires and 60 PSI in the back tires. You can adjust as necessary, some suggest 55 around.

Problem: Where is the fuse location for the auto dump valves?

Suggestion: It is located in the front by the emergency brake.

[About Us](#)
[History](#)
[Contact Chinook](#)
[Facility Tour](#)

TRAIL WAGONS

About Us

Chinook RV Camper Vans, originated in the garage of Don Lukehart Sr. in the spring of 1961. Mr. Lukehart, an avid enthusiast of outdoor camping, was frustrated with the lack of mobile campers that were presently being offered by manufacturers. In his garage at night, Mr. Lukehart with Gary, his son, worked on converting a Chevrolet Corvair into a mini camper. The results started a trend that revolutionized the RV industry.

In 1971, Gary Lukehart designed the present day Concourse, providing the public with the first one piece, fiberglass body motorhome, that even today carries the only lifetime guarantee in the industry. Chinook's commitment to ongoing improvements in quality, and innovative engineering, with strong emphasis on livability and comfort is customer proven. The result is today's state of the art Chinook RV, the ultimate two person coach. With dealers across North America and exports to Europe, the Middle East, and South America, Chinook RV has obtained international recognition as the finest manufacturer of mini motorhomes in the world.

Gross vehicle wt.	14,050
Approx. curb weight*	13,000
GCWR	20,000
Wheel base	176"
Bed Dimensions:	
Sofa Sleeper	76" x 56"
Dinette	68" x 36"
Twin Bed:	
Driver	78" x 36"
Passenger	78" x 27"

* Weights listed are approximate and may vary by floor plan and equipment. Listed values include: LE package, roof air & generator.

Ford Chassis:

- Super Duty Ford E-450 Full-Frame Chassis
- Twin I-Beam front suspension system
- 176" wheel base (provides excellent driving)
- 6.8 liter Triton V-10 gas engine with EFI (optional 6.0 liter diesel engine)
- 4-speed automatic transmission with overdrive
- Transmission and oil cooler
- Power Steering
- 4-wheel antilock brakes
- Driver and passenger side airbags
- Dual rear wheels
- Tilt wheel with cruise control
- Power windows
- Power door locks
- Heavy duty, 600 CCA battery
- Heavy duty, 130 amp alternator
- In-dash air conditioner
- 55-gallon fuel tank
- Cold climate pack and engine block heater
- 4.56 Regular axle
- AM/FM CD stereo
- 3-year/36,000-mile, bumper-to-bumper warranty
- 24-hour roadside assistance
- LT 225-75 R16 E rated all-season radial tires

Exterior Body:

- MAXLOADER™ suspension system
- 4-point automatic hydraulic leveling system (includes 4 leveling jacks and control panel)
- Limited, lifetime warranty on CHINOOK fiberglass body
- Divinycell™ 1/2" sandwich-foam construction in side walls
- Acoustic and thermal foam insulation
- Fiberglass inner roof liner with Divinycell™

Heating, Cooling, Power & Water Systems:

- 5-way systems monitoring panel
- Holding tanks: Gray - 40 gallon/Black - 20 gallon/Fresh water - 40 gallon
- Pressurized city water hookup
- Self-priming water pump
- 19 gallon LPG center frame-mount tank with remote fill
- Battery compartment with slide-out tray
- 4 heavy duty, deep cycle auxiliary batteries with
- 800 amperes of 12Vpower
- 6 gallon propane/electric hot water heater with auto-ignition
- 19,000 BTU Propane furnace with auto-ignition
- 30 amp/26' service cord
- 120V/12V power center, 100 AMP converter/charger with automatic transfer switch
- Auxiliary battery disconnect switch
- Bi-directional charging system
- Low-voltage coach disconnect with audible alarm
- Emergency start switch
- 1/2" sandwich-foam construction
- Insulated solid floor laminated to body (New balsa-core infused floor)
- Thermopane windows
- Side entry door with electric step
- 2 exterior storage compartments with flip-up doors (12.0 cubic feet curbside and 7.0 cubic feet roadside)
- Base coat/clear coat automotive paint graphics
- Sewer hose storage compartment with 20' hose
- Aluminum roof rack and ladder
- Side porch light
- Spare tire rear mount with continental kit
- Exterior cable TV/telephone jack
- Pre-wired for digital satellite system
- Powder-coated exterior brackets

Chinook Composite Cube Slide Rooms:

- Two HWH automatic hydraulic slide outs
- One front slide-out (W 79"/H 66"/D 14") with slide-out awning (optional furniture sofa or dinette)
- One rear slide-out (W 66"/H 66"/D 14") with slide out awning
- Automatic travel pin locks
- Air bladder seals
- HWH CAN (Controller Area Network) system

CHINOOK RV is continually striving to improve its products. Therefore, specifications and prices are subject to change without notice.

Summit Paint Scheme MSRP:
\$173,000-\$203,000

Special Features

Introducing the Summit 2700 with DIAB sandwich technology, two hydraulic room extensions with air-bladder room-seal, and automatic self-leveling system. CHINOOK builds the only class C motorhomes with HWH, state-of-the-art CAN (Controlled Area Network) technology - **until now, only available on high-end, class A motor coaches:**

Some of the new features:

- Contemporary, DIAB foam core shell construction
- New, lighter-weight balsa core floor system
- Fully-ducted air system
- Curb-side entry door
- Dry bath
- Increased ceiling-height (6'5")
- HWH, series 2000 CAN technology
- Hydraulic sofa slide by HWH and CHINOOK
- Hydraulic, automatic self-leveling system
- Room-extension with air-bladder seal

HWH ELECTRONICS AND COMPONENTS

- CHINOOK's Summit 2700 and Glacier 2500 are the only class C motorhomes with HWH, state-of-the-art CAN (Controlled Area Network) technology - integrated electronics with a single main trunk line operates leveling, room extension and bladder-seal systems.
- Computerized automatic self-leveling system with one-touch control - contemporary HWH 2000-series electronics and components developed specifically for CHINOOK.
- Air-bladder room seal eliminates bulky "bulb seals" and flange around room - room-extension has a smooth, automotive-fit appearance.
- HWH hydraulics provide fast, smooth and even room expansion and contraction - fully automated system with reliable pin-lock mechanism and one-touch control.

DIAB SANDWICH TECHNOLOGY

- Innovative materials and techniques make our single-piece fiberglass shell lighter, stronger, and more durable than ever - winner of the Composites Manufacturers Association, 2002 ACE Achievement Award using DIAB materials, vacuum bagging and resin infusion techniques.
- DIAB, ProBalsa flooring - provides stronger, more structurally-sound construction with dramatically reduced overall weight.
- DIAB Divinycell, sandwich-foam in sides -and roof - improved strength and rigidity with significant weight reduction.
- State-of-the-art materials and manufacturing techniques - provides improved thermal and acoustic insulation properties.

CHINOOK RV is continually striving to improve its products. Therefore, specifications and prices are subject to change without notice.

September 9th-11th, 2004
Hood River, Oregon - Western Region

First Annual Western Region Rally
Hood River—Sept. 9-12th

This is going to be a great rally with terrific scenery! We are staying at the "Bridge RV Park and Campground". It is located on a bluff overlooking the Columbia River, Washington side. From I-84, take exit 64 and cross the river. Please see the map, page 3. Here is the itinerary with web references:

Wednesday, September 8, 2004

Arrive Bridge RV Park (1-888-550-PARK) www.bridgev.com, early for a rail tour the following morning, or if you skip this option, you may come later on Thursday.

ens, chicken, beans, salad, beer and wine will be served. Western ducts encouraged, but optional—(no spurs please!)

Friday, September 10, 2004

Maryhill Museum of Art on the Columbia River and Maryhill Winery, www.maryhillmuseum.org & www.maryhillwinery.com.

9:30 a.m. depart the park via limo, van or bus to the museum. You will see over 400 objects from Native People of North America, over forty fashion ensembles from the 40s, private collection paintings from 1880-1890, other paintings,

Winterizing Your Chinook

Draining the fresh water tank

Periodically it is necessary to drain the fresh water system. Opening the water tank drain petcock and the hot and cold line petcocks do this. On rear entry models, all three petcocks are located inside the coach. On side entry models, the water line drain petcocks are inside the coach, while the water tank drain petcock is on the bottom of the tank located below the coach. The water heater anode rod must be removed to drain the water heater.

Winterizing fresh water system

To winterize the fresh water system simply drain the fresh water lines and tank. This will help ensure that there will be no damage to the lines or tank.

****Caution** (side entry models) Because the fresh water tank on the side entry models is located on the exterior of the coach (mounted below the coach floor), it is subject to freezing temperatures. While the insulation covering the tank will prevent the water from freezing under mildly subfreezing conditions (in the mid 20's degrees F) for two to three days. The water will eventually freeze under prolonged sub-freezing conditions.

Winterizing waste water system

After draining the wastewater tanks, add a recommended solution to prevent freezing in traps and other water filled cavities in the drainage system.

****WARNING: DO NOT USE ANTIFREEZES OTHER THAN THOSE RECOMMENDED FOR PLASTIC PIPES AND RECREATIONAL VEHICLES.**

The Chinook Warranty

Chinook Warranty Covers:

Chinook warrants to the *original* owner of each new model Chinook Motorhome that for a period of thirty-six (36) months or 36,000 miles, whichever comes first, it will repair or at its option replace any defects resulting from poor Chinook workmanship on the motorhome manufactured by Chinook.

Chinook does not manufacture the chassis, chassis equipment, nor the trade equipment installed in the motorhome, such as the refrigerator, range, heater, air conditioner, power plant, television, video cassette players, etc. The chassis and such trade equipment are warranted separately by the manufacturers of each product. The Chinook warranty applies only to the labor and materials provided by Chinook in the installation of such items.

What is not Covered by Warranty:

1. Malfunctions resulting from misuse, negligence, alteration, accident, lack of required maintenance, overloading beyond the applicable weight rating, use of circuits, voltages or frequencies other than those indicated on the appliance name plate;
2. Loss of time, inconvenience, loss of use of the motorhome, towing charges, rental cars or other consequential damages;
3. Any motorhome on which the odometer mileage has been altered and the actual mileage cannot be readily determined;

4. Any motorhome registered and normally operated outside of the United States or Canada. The warranty for these motorhomes shall be that authorized for the country in which the vehicle is registered and normally operated.
5. The warranty is valid only to the original owner. It does not cover subsequent owners of the motorhome.

Chinook Obligations:

1. Repairs qualifying under this warranty will be performed by an authorized Chinook dealer or the Chinook service department upon a prearranged appointment.
2. During the first ninety (90) days of the warranty period, any authorized Chinook dealer will make the following service adjustments, if needed, at no charge to the owner.
 - a. Fix any electrical shorts
 - b. Check the L.P.G. system
 - c. Tighten bolts, fasteners and fittings
 - d. Fix any and all water leaks (one year)

| [Glacier](#) | [Destiny](#) | [Concourse](#) | [Premier](#) | [Baja](#) | [Chinook Quality](#) | [Home](#)

Our new 70,000 square foot facility in Yakima, Washington was opened in 1999. We also opened our new 40,000 square foot fiberglass facility in 1999.

Production begins with Ford and Chevy Cutaway Chassis.

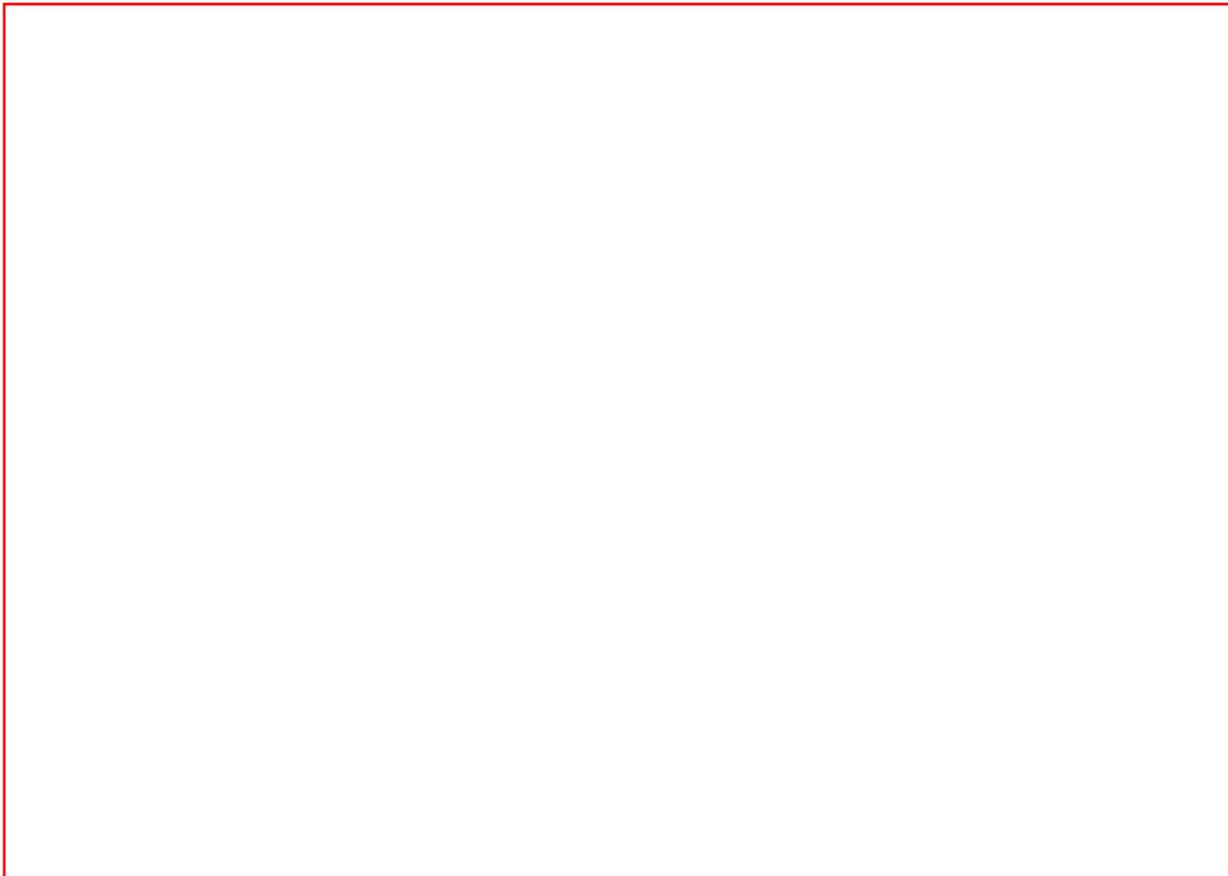

We run our own state of the art fiberglass facility, ensuring the maximum strength and quality of our one-piece fiberglass shells.

Workers inspect and line the shell with quality materials.

Once the fiberglass body has been thoroughly buffed and detailed, it is ready to be installed onto a vehicle chassis.

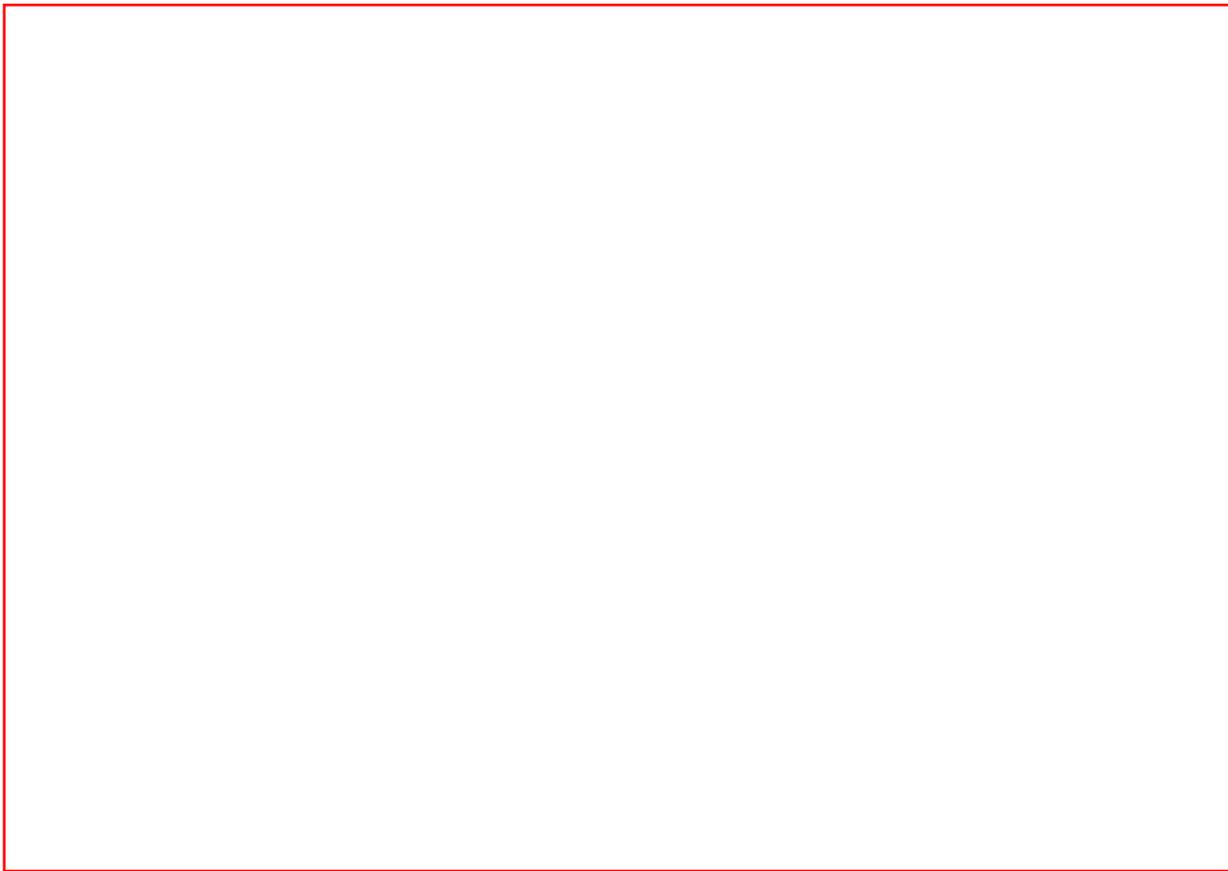

- Our fiberglass shell offers our owners many selling advantages:**
- 1. Better Aerodynamics**
 - 2. Easy to Repair**
 - 3. No Seams to Leak**
 - 4. Ability to Install a Roof Ladder**
 - 5. You can Walk on our Roof**
 - 6. You can Install a Storage Pod**
 - 7. It Looks Great and is Backed by our Lifetime Warranty to the Original Owner.**

Our front overhead cabinet is mad of fiberglass, not wood, making it more durable while weighing less than a typical wood overhead cabinet.

Each base cabinet is pre-assembled and must meet exact specifications for proper fit.

At each station on the production line we perform numerous tests including gas and electrical. Quality is Job #1 at Chinook and these stringent tests must be met before the coach can be moved to the next station.

An overview look at the assembly line floor.

About Trail Wagons

[About Us](#)
[History](#)
[Contact Chinook](#)
[Facility Tour](#)

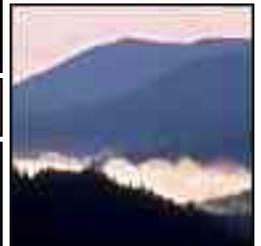

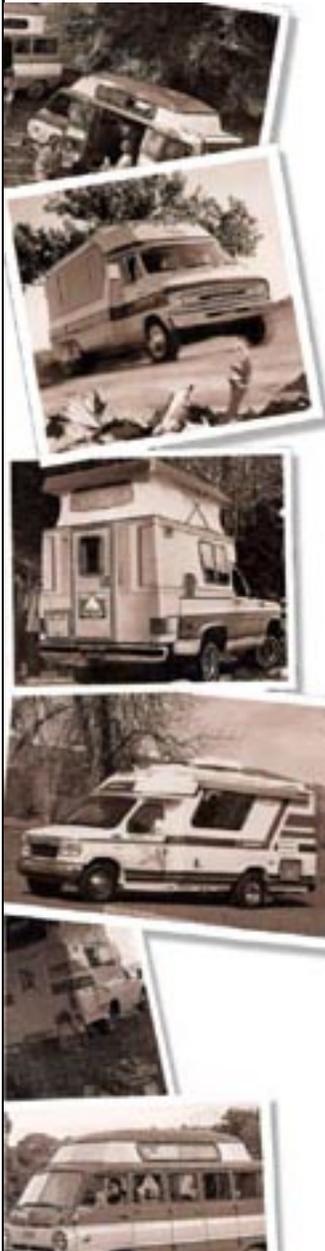

TRAIL WAGONS

The History Trail Wagons

Most of the successful companies in the United States can trace their roots back to ideas that were originated in the minds of entrepreneurs. Time has shown the products were usuallu non-conforming, non-traditional in nature, but filled a need for the American consumer.

Chinook RV Camper Vans originated in the garage of Don Lukehart Sr. in the spring of 1961. Mr. Lukehart, an avid enthusiast of outdoor camping, was frustrated with the lack of mobile campers that were offered by manufacturers. Working at night in his garage with his son Gary, Mr. Lukehart converted a Chevrolet Corvair into a mini-camper. The results of this work started a trend that would revolutionize the RV industry.

In 1971, Gary Lukehart designed the present day Concourse, providing the public with the first one piece fiberglass body motorhome. Even today the Concourse carries the only lifetime guarantee in the industry. Chinook's comitment to ongoing improvements in quality and innovative engineering with a strong emphasis in livability and comfort is customer proven. The result is today's state

of the art Chinook Motor Home, the ultimate two person coach. With dealers across North America and exports to Europe, the Middle East, and South America, Chinook RV has obtained international recognition as the finest manufacturer of mini motorhomes in the world.
